

Type of contract: Full time/ Undetermined

To support its growing operations in Luxembourg, Datacenter Luxembourg S.A. (www.datacenter.eu) is looking for a:

Cloud Automation Engineer (m/f)

Datacenter.eu, a market leading Internet, Cloud and Colocation Services Provider is seeking a full time Cloud Automation Engineer to design and develop high performance automation solutions for critical applications. Your mission will be as follows:

- Develop and support automation infrastructure, tools, and processes;
- Support DevOps concepts and practices by encouraging cross-functional communication, collaboration and design;
- Perform coding, testing, and maintenance on existing programs in close collaboration with other staff members;
- Support the implementation of automation frameworks for Linux applications and Cloud environment;
- Participate and support in team design, specification, and code reviews;
- Collaborate with the Infrastructure team to create and evolve policies, best practices, and frameworks for distributed system automation needs;
- Build and maintain tools for monitoring, notifications, and analysis
- Perform other duties and projects as assigned;
- Participate in technical reviews, provide feedback on processes that work and what can be improved, to ensure we continually raise the bar

EXPERIENCE AND KEY COMPETENCES

- Must have, at minimum, a bachelor (level) degree in Computer Sciences;
- Minimum 3 years of Dev Ops experience;
- Linux system administration (configuration, installations, automation, and monitoring)
- LAMP stack experience
- Experience automating infrastructure and software delivery to production
- Experience of working with VMware or other virtualised technologies
- Familiarity with open source configuration management and deployment tools such as Ansible, Puppet and Terraform
- Using Dev-Ops tooling (e.g. Ansible, Git, Octopus, Jenkins, Puppet, Chef, etc.)
- Good all-round DevOps skills (config. management, deployment pipelines, solid scripting skills etc.)
- Web development knowledge in Django, JavaScript
- Prior experience in an internet-facing technical operations role with SLA obligations
- Good level of English (both oral and written). Any other languages are considered an asset;
- Strong analytical, conceptual and problem-solving abilities;
- Work collaboratively across teams;

- A certain degree of creativity and latitude is required;
- Strength in problem solving, issue-resolution, ability to work in a deadline-driven work environment, attention to detail, and ability to multitask.
- Pursue educational opportunities to expand knowledge and improve skills through workshops, classes, seminars, training;
