

**Type of contract:** Full time/ Undetermined

To support its growing operations in Luxembourg, Datacenter Luxembourg S.A. ([www.datacenter.eu](http://www.datacenter.eu)) is looking for a:

## Cloud VMware Engineer / Architect (m/f)

Datacenter.eu, a market leading Internet, Cloud and Colocation Services Provider is seeking a full time VMware Engineer. The VMware Engineer will be part of a high technology engineering team and responsible for designing, implementing, delivering and maintaining cloud infrastructure solutions. He will also be in charge of:

- Managing the daily operations of the cloud infrastructure production systems;
- Developing reports for performance, troubleshooting and capacity planning;
- Developing custom blueprints and workflows to automate and simplify tasks;
- Keeping system performance at a very high level (system monitoring and analysis, performance tuning, troubleshooting, system hardware, installation, firmware patching, and software patching);
- Providing support for server hardware failures and assist remotely with hardware replacement;
- Participating in the 24x7 on-call support rotation, responding to support calls both during and after business hours;
- Providing configuration management and security compliance for the virtual infrastructure software and hardware;
- Developing and updating standard operating procedures and user guides;
- Completing service requests or incidents tickets related to the cloud infrastructure;
- Performing daily system monitoring, verifying the integrity and availability of all the hardware, resources, virtual resources, systems and key processes;
- Performing advanced troubleshooting and root cause analysis to expedite incident resolution;
- Developing scripts to gain efficiencies for reporting and automating repetitive tasks.

### EXPERIENCE AND KEY COMPETENCES

- Must have, at minimum, a bachelor (level) degree in Computer Sciences;
- Working knowledge and experience with VMware ESXi 6.0/6.5/6.7
- Strong experience including, but not limited to, vCenter Server Appliance, vCloud Director, vCloud Availability, NSX.
- Skilled with vSphere systems administration and support including VMotion, HA, DRS, VDS, Affinity rules, vCenter, storage migrations, and P2V migrations
- Prior experience in an Internet-facing technical operations role with SLA obligations
- Knowledge of DellEMC Hardware
- Working experience with Veeam Backup and Replication is an asset
- Experience with current best practices in IT standards, principles, and security practices

- Good level of English (both oral and written) is mandatory, French is considered as an asset and all other language is considered as a plus
- Strong analytical, conceptual and problem-solving abilities;
- Work collaboratively across teams;
- A certain degree of creativity and latitude is required;
- Strength in problem solving, issue-resolution, ability to work in a deadline-driven work environment, attention to detail, and ability to multitask.
- Pursue educational opportunities to expand knowledge and improve skills through workshops, classes, seminars, training;
